GEOTECHNICAL SOLUTIONS

ADMIR AFRICA

Geotechnical Solutions In Civil Engineering

ADMIR AFRICA offers geotechnical and civil engineering solutions based on geosynthetics and a variety of other products.

The solutions are supplied with design engineering and installation support.

ADMIR represents leading manufacturers, and provides knowledge and technical support in all stages of the project, including design and on-site installation services. Stock levels are maintained to serve projects on short notice. Our know how and international practical experience allow us to offer custom made engineering solutions with cost benefit advantages.

Applications

Roads / Railways

- Separation and reinforcement of construction layers by geotextiles and geogrids
- Reinforcement of asphalt structures with geogrids
- Geocells/Neoloy for base reinforcement

Corrugated Steel Pipes / HDPE Pipes

Stabilizing embankment on soft soils

- High strength woven geotextiles

Retaining Walls

Walls and embankments in "reinforced soil" method by geogrids

Reservoirs Lining

- Lining of reservoirs and landfills
- Lining of water reservoirs
- Secondary lining for oil storage tanks
- Waste disposal sites lining and capping
- Leachate drainage

Protecting Slopes from Rock Fall

Installation of steel nets, anchors and various accessories

Slopes and Channels Protection

With cellular confinement system (Geocells)

Protecting Riverbanks and Slopes

With gabions and mattresses

Concrete and Industrial Floors

Steel fibers, polymer fibers and materials for concrete floors

Steel Guardrails

Products List:

- Geotextile (Woven/Non-Woven)
- Geogrid for Soil Reinforcement
- Geogrid for Asphalt Reinforcement
- Gabions and Mattresses
- Geomembranes - HDPE/LDPE
- Cellular Confinement System - Geocell/Neoloy
- Steel Fibers/PP Fibers for Concrete
- Rock Fall Netting Protection
- Drainage Mats for Underground Structures
- Corrugated Pipes
- HDPE Pipes
- Steel Culverts
- Steel Guardrails
